

ACCEPTANCE LETTER

Paper ID: ICSCSS-685

Paper Title: Heterogeneous Multicore SoC Architecture for Real-Time Biomedical Data Analysis

Author Name(s): Subbulakshmi A, Balaji S, Manikandan L

Dear Author(s)

Greetings from the Organizing Committee of the 4th International Conference on Sustainable Computing and Smart Systems (ICSCSS 2026).

We are pleased to inform you that your submitted paper has been accepted for presentation at 4th ICSCSS 2026, scheduled to be held during 22 - 24 July 2026 at Hindusthan College of Engineering and Technology, Coimbatore, India. The conference aims to bring together researchers, academicians, industry professionals, and scholars from around the world to exchange innovative ideas and advancements in the fields of sustainable computing and smart systems. Your contribution is considered valuable to the conference technical program, and we are delighted to invite you to present your research work during the conference sessions.

We sincerely appreciate your interest and participation in ICSCSS 2026. We are confident that the conference will provide an excellent platform for knowledge sharing, networking, and academic collaboration.

We look forward to welcoming you to Coimbatore, India, and wish you a successful presentation at ICSCSS 2026.

With Thanks,

ICSCSS 2026
Conference Chair

Proceedings by

REVIEW COMMENTS

Comments 1:

1. Justify the lack of power consumption analysis for real-time biomedical deployment.
2. Explain how the architecture ensures reliability and fault tolerance in healthcare applications.
3. It is suggested to address possible bottlenecks caused by shared memory and bus contention.
4. What are the FPGA resource utilization and power consumption results of the proposed SoC?
5. No research citations like [1], [2], [3] should be given in the conclusion section. Check and remove it.
6. Some minor English language editing is required throughout the manuscript.

Comments 2:

1. The manuscript requires better clarity in the presentation of concepts and technical content.
2. The structure of the paper should be revised to improve continuity between sections.
3. Additional explanation is needed in certain parts to enhance reader understanding.
4. The manuscript contains formatting and stylistic inconsistencies that should be corrected.
5. The literature review can be expanded to include more recent and relevant studies.
6. Some resultant observations require stronger interpretation and discussion.
7. The paper would benefit from more precise and concise academic writing.
8. Certain sections appear repetitive and can be streamlined for better presentation.
9. Further revision is necessary to improve the overall technical depth and presentation quality of the manuscript.
